Accessing the new SAT>IP feature in the VLC media player (3.0.0 Vetinari), can be easily achieved by these following steps:

1. After launching the VLC media player click "View" and then click "Playlist" in the main dialog menu;

or alternatively,

use the Ctrl+L shortcut.

3. In the "Playlist" view, click on "Universal Plug'n'Play".

The name of a SAT>IP server shall appear if discovered on the local LAN.

4. Click on the SAT>IP server name to retrieve the list of published TV and radio channels from the <u>www.satip.info</u> website.

5. Finally, click on the name of a TV channel.

In order to check/select another orbital position, please refer to the following steps:

1. In the main dialog menu, click "Tools" and then click "Preferences"

or alternatively,

use the Ctrl+P shortcut.

2. In the "Simple Preferences" view, switch to the "Advanced Preferences" view by clicking the "All" radio button in the bottom left under "Show settings".
